

February 10, 1994 LB 988

concern ourselves with major legislation, then we've got a problem in even why we're here. There is not a lot of major stuff that is confronting us this year. There is not a lot of major legislation that has to get through this year. As far as I am concerned, protecting our youth is major legislation, it must get done this year, we have to be willing to take the time to do that. I would just as soon take the time to get it right than go through quickly and get it wrong. I would oppose the bracket motion. I think Senator Chambers is right, if we're not going to go with it word by word now, he's going to do it at some other level or somebody else is going to do it, go through it at some other level. At some point it is going to get done if we're going to pass the bill. I'd just as soon, we've been making progress, I think we're close on this section and we can move off of this and onto other areas. As it is, we're continuing to take time almost every day on bracket motions. If we could take away the time we spend on bracket motions, we'd be farther along on the bill itself. I'd urge us to reject the bracket motion.

SENATOR CROSBY: Thank you, Senator Lindsay. Senator Bernard-Stevens, on the bracket? Senator Bernard-Stevens waves off. Senator Fisher, on the bracket motion?

SENATOR FISHER: Madam Speaker and members, I call for a question on the bracket amendment.

SENATOR CROSBY: The question has been called. Do I see five hands? Senator Fisher, I think probably we need to discuss the bracket just a little further. Senator Chambers, your light is on.

SENATOR CHAMBERS: Madam President and members of the Legislature, and I'm going to tell Senator Fisher and the rest of you all something. If you want to cut off the debate, you can do it on that motion, then I'll just reconsider and we will continue to talk. You all are tired, you know, you're a free agent and you don't have to stay in here and listen, but if you stay in here you're going to be exposed to what is said whether you listen or not. Those who want to get to something else should have had something to say about the bill coming in in this form. But now that's it here, nobody jerks my chain like you all's chain is jerked. The NRA doesn't tell me put this amendment on in committee as he told some people, or don't allow this to be amended as they told some people. That's why we got
